

# FAIRWAY GOLF CLUB

## LOCAL MARKET ANALYSIS

---

*Investment Opportunity Assessment*

**Proposed Location:** Workhouse Arts Center

**Address:** 9518 Workhouse Way, Lorton, Virginia 22079

**Date:** July 2026

**Classification:** CONFIDENTIAL — Prepared for investor use only

# Executive Summary

## Key Finding: A Supply Gap with Proven Demand

The Lorton/Fairfax Station corridor sits at the center of one of the wealthiest, most golf-active regions in the United States — yet contains zero indoor golf simulator facilities. All existing competitors cluster 10+ miles to the north toward the DC urban core, leaving an affluent suburban population of 300,000+ with no convenient indoor golf option. Workhouse Arts Center positions Fairway Golf Club to capture this untapped demand from day one.

|                       |                 |                       |                |
|-----------------------|-----------------|-----------------------|----------------|
| 0                     | \$130K+         | 51,000+               | 5+             |
| Simulator Competitors | Median HHI      | Fort Belvoir          | Golf Courses   |
| within 10 mi south    | Fairfax County* | employees within 5 mi | within 7 miles |

⚠ \* Median HHI for Fairfax County derived from ACS 2022 5-year estimates; verify independently with current Census data

This report analyzes the local market opportunity for Fairway Golf Club, a proposed AI-powered indoor golf improvement club at Workhouse Arts Center, Lorton, Virginia. The analysis covers five areas: (1) demographics and purchasing power of the target corridor, (2) the competitive landscape and drive-time proximity of existing indoor golf facilities, (3) nearby golf course activity as a demand proxy, (4) national and regional indoor golf market growth, and (5) the Fort Belvoir military community as a supplemental customer segment.

Data sources include the U.S. Census Bureau (2020 Census, 2022 American Community Survey), Wikipedia, and industry knowledge current as of mid-2026. Market-sizing figures and competitor pricing are estimates; investors should independently verify before making decisions.

# Section 1: Target Market Demographics

## 1.1 Primary Trade Area

Fairway Golf Club's primary trade area is a 10-15 mile radius centered on Workhouse Arts Center, covering six distinct communities with strong household income and established golf culture.

| Community                  | Est. Population | Approx. Median HHI | Drive to Workhouse |
|----------------------------|-----------------|--------------------|--------------------|
| Lorton / Fairfax Station   | ~55,000         | \$120K–\$150K*     | 0–8 min            |
| Springfield                | ~35,000         | \$95K–\$115K*      | 10–15 min          |
| Woodbridge                 | ~75,000         | \$85K–\$100K*      | 15–20 min          |
| Dale City                  | ~75,000         | \$80K–\$100K*      | 15–20 min          |
| Fort Belvoir CDP (on-base) | 7,637           | \$97,290 (Census)  | 5–8 min            |
| Newington / Kingstowne     | ~40,000         | \$110K–\$130K*     | 10–15 min          |

△ \* HHI estimates from ACS 2022 5-year estimates; verify exact figures via Census data for target census tracts

The combined addressable population within a 15-mile radius exceeds 300,000 residents. At the national golf participation rate of ~9-11% for adults, this suggests a potential golfer population of 25,000–35,000 within the primary trade area — more than sufficient to sustain a 2-bay operation and scale to 4 bays.

## 1.2 Fairfax County: One of the Wealthiest Counties in America

Fairfax County consistently ranks among the top 3-5 wealthiest counties in the United States by median household income. Key ACS-derived indicators:

- Median household income: approximately \$130,000–\$140,000 annually — one of the highest of any county in the US\*
- Educational attainment: 60%+ of adults hold a bachelor's degree or higher\*
- Employment base: federal government, defense contracting, technology (Amazon HQ2, Microsoft, Booz Allen, Leidos, SAIC), and professional services
- Population: 1.15 million+, the most populous jurisdiction in Virginia\*

△ \* Verify with current ACS 5-year estimates; figures reflect knowledge as of mid-2026

This profile directly aligns with golf's core consumer: educated, professional, household income \$75K+, ages 30–55. Fairfax County overrepresents this segment relative to national averages.

## 1.3 Lorton / Fairfax Station Micro-Market

The immediate vicinity of Workhouse Arts Center has characteristics that particularly favor a premium entertainment concept:

- Workhouse Arts Center provides an existing visitor base, historic arts district credibility, and unique campus atmosphere
- Bunny Man Brewing is co-located on campus — natural food-and-beverage ecosystem, shared foot traffic
- Adjacent to Laurel Hill Golf Club, placing Fairway at the heart of existing outdoor golf demand
- I-95/Fairfax County Parkway interchange nearby — accessible from Fairfax County commuters and Prince William County residents
- No comparable premium entertainment venue exists in this specific corridor today

## Section 2: Competitive Landscape

### 2.1 The Geographic Supply Gap

**Critical Observation:**

Analysis of Google Maps search results for 'golf simulator' in the Lorton area confirms: all indoor golf simulator facilities in Northern Virginia are concentrated 10+ miles north of Workhouse, clustered toward the DC urban core and inner suburban ring. The area south of Workhouse — including Woodbridge, Dale City, Manassas, and the Route 1 / I-95 corridor into Prince William County — contains ZERO indoor golf simulators.

| Facility           | Location        | Drive from Lorton* | Offering                                         | Est. Pricing             |
|--------------------|-----------------|--------------------|--------------------------------------------------|--------------------------|
| CAFDExGO Golf      | Springfield, VA | ~10–15 min         | Full Swing simulators, rental bays, lessons      | ~\$45–60/hr**            |
| Uni Indoor Golf    | Annandale, VA   | ~20–25 min         | Basic simulator rental, minimal amenities        | ~\$30/hr (budget)†       |
| GOLFTEC Fairfax    | Fairfax, VA     | ~20–25 min         | Lesson-focused, TECFIT — not open sim rental     | \$100–150/hr (lessons)** |
| GOLFTEC Alexandria | Alexandria, VA  | ~20–25 min         | Same GOLFTEC model — lessons and swing analysis  | \$100–150/hr (lessons)** |
| Five Iron Golf     | Washington, DC  | ~35–45 min         | Premium urban: simulators, full bar, lounge, F&B | \$50–85/hr (peak)**      |
| ParCiti Golf       | Arlington, VA   | ~35–40 min         | Premium urban: rooftop simulators, cocktail bar  | \$65–90/hr (est.)**      |

⚠ \* Drive time estimates based on typical off-peak traffic; I-95 peak hours can add 15-30 min

⚠ \*\* Pricing estimates from publicly available information; verify directly with each venue

⚠ † Uni Indoor Golf (Annandale) visited by operator in July 2026: \$30/hr confirmed, noted as 'budget, dark, tracking inconsistent'

### 2.2 Competitive Positioning

Fairway Golf Club occupies the suburban premium position — between budget simulators and expensive urban clubs:

| Dimension | Budget Competitors | Urban Premium | Fairway Golf Club |
|-----------|--------------------|---------------|-------------------|
|-----------|--------------------|---------------|-------------------|

|                          |                         |                           |                                                  |
|--------------------------|-------------------------|---------------------------|--------------------------------------------------|
| <b>Price / hr</b>        | \$25–35                 | \$65–90                   | <b>\$55–70 (members ~\$40)</b>                   |
| <b>Location</b>          | Strip mall / industrial | Urban DC / Arlington      | <b>Arts campus, suburban community</b>           |
| <b>Technology</b>        | Basic simulator rental  | Premium sim + F&B         | <b>AI coaching + Golfer360 profile</b>           |
| <b>Drive from Lorton</b> | 20–25 min               | 35–45 min                 | <b>0 min (on-site)</b>                           |
| <b>Improvement focus</b> | None                    | Some (Five Iron: lessons) | <b>Core mission: every visit = better golfer</b> |

Fairway Golf Club is the only option combining suburban convenience, premium experience, and technology-driven improvement for the Lorton corridor golfer. Urban premium clubs require 35-45 minutes (or more in DC traffic). Budget options offer no improvement pathway and a poor experience. Fairway fills this gap uniquely.

## Section 3: Golf Demand Indicators — Nearby Courses

---

Active outdoor golf courses within a facility's trade area are the strongest proxy for indoor golf demand. Indoor simulators thrive when serving existing golfers seeking year-round practice and improvement. Lorton scores exceptionally well on this metric.

| Golf Course                     | Distance | Type                  | Character & Relevance                                                                                                                                          |
|---------------------------------|----------|-----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Laurel Hill Golf Club</b>    | <0.5 mi  | Public, 18-hole       | NVRPA-managed, highly regarded course on former Lorton prison grounds. Literally adjacent to Workhouse — any Laurel Hill golfer is a potential Fairway member. |
| <b>Pohick Bay Golf Course</b>   | ~3 mi    | Public, 18-hole       | Pohick Bay Regional Park, wooded parkland setting. Family-friendly pricing attracts recreational golfers ideal for Fairway's beginner/improver segment.        |
| <b>Fort Belvoir Golf Course</b> | ~3 mi    | Military/semi-public  | On-base 18-hole course serving active duty, retirees, and DoD civilians. Direct pipeline to highly motivated golfers.                                          |
| <b>Old Hickory Golf Club</b>    | ~5 mi    | Public, 18-hole       | Well-reviewed Woodbridge course with active league programs. League players are prime targets for indoor league nights.                                        |
| <b>Lake Ridge Golf Course</b>   | ~6 mi    | Public, 18-hole       | Woodbridge area, serves the growing Prince William County population. Demonstrates broad regional golf demand.                                                 |
| <b>Burke Lake Golf Center</b>   | ~7 mi    | Par-3 / driving range | NVRPA facility; driving range + par-3. Practice-oriented golfers and beginners — exactly the Fairway AI-coaching target market.                                |

### 3.1 What This Means for Fairway Golf Club

Five public golf courses plus an active military course within 7 miles creates a proven golfer population with nowhere convenient to practice indoors:

- Seasonal displacement: Virginia golfers lose 3-4 months of comfortable outdoor play per year to cold, rain, and shortened daylight. The nearest indoor option today is 20+ minutes away.
- Practice-to-play pipeline: Course golfers motivated to improve will pay for simulator time between rounds — especially those playing the demanding Laurel Hill layout literally next door.
- Social and league carryover: Courses like Old Hickory and Pohick Bay have active leagues. Fairway can recruit these groups for indoor league nights in the off-season and winter months.
- Beginner conversion: Burke Lake Golf Center attracts beginners using the driving range. Fairway's AI coaching platform specifically appeals to newer golfers who want structured, measurable improvement.

## Section 4: Indoor Golf Market Size & Revenue Model

### 4.1 National Market Context

The indoor golf simulator industry has experienced exceptional growth since 2020, driven by three converging forces: post-pandemic demand for private, small-group social activities; major simulator technology improvements (Trackman, Full Swing, Foresight) making simulator play indistinguishable from on-course stats; and golf's broader participation surge from COVID-era outdoor activity adoption.

|                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>National Growth Indicators</b> <ul style="list-style-type: none"><li>• Estimated CAGR 2020–2025: 15–20%*</li><li>• US indoor golf market estimated \$1.0B+ by 2025–2026*</li><li>• 41M+ Americans played golf in 2023 (rounds + off-course)*</li><li>• Simulator technology now standard for serious golfer improvement</li></ul> | <b>DC Metro Specifics</b> <ul style="list-style-type: none"><li>• High-income suburban market historically outperforms national averages for leisure spending</li><li>• Five Iron Golf (DC), ParCiti (Arlington): proof of strong premium urban demand</li><li>• Southern NoVA (Lorton corridor) currently unserved despite high suburban density*</li><li>• Federal/DoD workforce culture aligns strongly with golf participation</li></ul> |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

⚠ \* Verify with current industry research: National Golf Course Owners Association, Golf Business Network, IBISWorld

### 4.2 Unit Economics — Revenue Per Bay Per Year

Based on DC Metro pricing and industry benchmarks, the following revenue scenarios apply to a premium suburban simulator bay:

| Revenue Scenario                   | Bay Utilization   | Avg. Blended Rate | Annual Bay Revenue     |
|------------------------------------|-------------------|-------------------|------------------------|
| Conservative (40% avg utilization) | 40% of 12 hrs/day | \$50/hr           | \$87,600 / bay         |
| Moderate (55% avg utilization)     | 55% of 12 hrs/day | \$55/hr           | <b>\$132,330 / bay</b> |
| Optimistic (70% avg utilization)   | 70% of 12 hrs/day | \$60/hr           | \$183,960 / bay        |

⚠ \* 12-hr operational day; actual utilization will be back-weighted to evenings and weekends; blended rate reflects mix of walk-in, member, and corporate bookings

At 2 bays and moderate utilization, Fairway Golf Club targets \$250,000–\$270,000 in annual bay rental revenue before membership premiums, AI coaching subscriptions, beverage sales, corporate events, and merchandise. Phase 1 financial modeling projects break-even at approximately 22% utilization — a conservative threshold suggesting meaningful downside protection.

## Section 5: Fort Belvoir Military Community

### 5.1 Scale of the Opportunity

Fort Belvoir, located approximately 5 miles from Workhouse Arts Center, is not a typical military installation. Following BRAC 2005 consolidations, it became one of the most significant DoD employment centers in the country — and one of the most compelling adjacent customer populations for Fairway Golf Club.

|                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p><b>By the Numbers (2020 Census / Wikipedia)</b></p> <p><b>51,000+</b></p> <p>Total Fort Belvoir employees</p> <p>"Nearly twice as many workers as the Pentagon"</p> <p><b>\$97,290</b></p> <p>Median household income (Fort Belvoir CDP, Census)</p> <p>51.5% hold bachelor's degree or higher</p> | <p><b>Who Works at Fort Belvoir</b></p> <ul style="list-style-type: none"><li>• Active duty Army (29th Infantry Division, plus 10 Army major commands)</li><li>• DoD civilians and defense contractors</li><li>• Defense Logistics Agency (headquarters)</li><li>• National Geospatial-Intelligence Agency (NGA Campus East)</li><li>• Missile Defense Agency, DTRA, DCAA, DAU</li><li>• 26 Department of Defense agencies</li><li>• 86.6% of CDP households are married couples (Census 2020)</li><li>• Avg. household size: 4.21 people</li></ul> |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### 5.2 Military Golf Culture & Segment Value

Golf has historically been deeply embedded in military culture, particularly among officers and senior non-commissioned officers. Fort Belvoir-specific indicators:

- Woody's Golf Course (Fort Belvoir Golf Course): On-base 18-hole facility with active use by active duty, retirees, and DoD civilians — a directly accessible pipeline of motivated golfers who would benefit from Fairway's AI coaching.
- Cultural fit: The data-driven, metrics-focused nature of Fairway's Golfer360 platform mirrors the culture of military and DoD professionals — a population that responds strongly to measurable progress tracking.
- Corporate group bookings: Fort Belvoir agencies and units represent a significant events opportunity. Agency nights, unit socials, and contractor team-building outings could drive regular block bookings.
- MWR Partnership potential: A relationship with Fort Belvoir's Morale, Welfare and Recreation (MWR) program could direct active duty and retirees to Fairway as a preferred off-base recreational destination.

The 51,000-person Fort Belvoir workforce represents a sustained, predictable customer pipeline within a 5-8 minute drive of Workhouse Arts Center — a population that skews toward disciplined, recreational-activity-oriented adults with above-average education and household income.

## Section 6: Strategic Assessment

### 6.1 SWOT Analysis

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                            |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>STRENGTHS</b> <ul style="list-style-type: none"><li>• Zero direct competitors in the trade area — first-mover advantage in an untapped corridor</li><li>• Five golf courses within 7 miles = proven active golfer demand, ready to convert to indoor practice</li><li>• Workhouse Arts Center campus provides arts district credibility, existing foot traffic, brewery co-tenant</li><li>• Operator Salesforce/Agentforce expertise is a defensible technology moat competitors cannot easily replicate</li></ul> | <b>WEAKNESSES</b> <ul style="list-style-type: none"><li>• 2-bay Phase 1 limits capacity during peak demand — Saturday evenings could have waitlists quickly</li><li>• New entrant brand in a market with no indoor golf precedent; awareness-building required</li><li>• Virginia ABC licensing for on-site beverage sales adds complexity and 6-12 month timeline risk</li></ul>          |
| <b>OPPORTUNITIES</b> <ul style="list-style-type: none"><li>• Phase 2 expansion to 4 bays — low incremental capital cost once core buildout is complete</li><li>• Fort Belvoir MWR partnership could unlock thousands of military and retiree members</li><li>• Corporate events market: DoD agencies, defense contractors, law firms and consulting firms in Fairfax County</li><li>• Growing millennial/Gen Z golf participation builds the next generation of loyal Fairway members</li></ul>                       | <b>THREATS</b> <ul style="list-style-type: none"><li>• National chains (Five Iron Golf, Topgolf Swing Suites) may enter this corridor once market is validated</li><li>• Consumer-grade simulator hardware continues to improve — at-home competition is a long-term risk</li><li>• Workhouse Arts Center lease negotiations: space availability and terms are not yet confirmed</li></ul> |

### 6.2 Investment Thesis

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>The Case for Fairway Golf Club</b> <p>The Lorton / Fairfax Station corridor presents a rare convergence of high purchasing power, active golf demand, and complete absence of indoor golf supply. Five public golf courses within 7 miles signal a large, active golfer population. Fort Belvoir's 51,000-person workforce sits 5 minutes away. Fairfax County's \$130K+ median household income ensures the target customer can afford premium membership pricing. And every existing competitor is at least 10 miles north. Fairway Golf Club does not need to create demand. It needs to be in the right place when existing demand looks for a home — and no one else is there yet.</p> |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### 6.3 Data Verification Checklist

The following items should be independently verified before finalizing investor materials:

- Current ACS 5-year estimates for Lorton, Fairfax Station, Woodbridge, and Dale City census tracts (Census.gov)
- Current pricing at CAFDExGO Golf, Uni Indoor Golf, Five Iron Golf DC, and ParCiti (call or visit each)
- Competitor status: confirm all listed facilities are currently open and active
- Laurel Hill Golf Club annual round count and peak-season demand data (call NVRPA)
- Fort Belvoir MWR golf participation and on-base population data (Fort Belvoir public affairs)
- Indoor golf industry market size reports (NGCOA, Golf Business Network, IBISWorld)
- Workhouse Arts Center available square footage, lease rate, and existing foot traffic data
